MARITIME SECURITY COMPLIANCE GROUP / PERSONAL DEVICE SECURITY

CYBERSECURITY DOESN'T STOP WHEN YOU LEAVE WORK.

Protect your personal computer, phone and tablet with these six simple steps.

Contact MSCG for more information at **https://mtsa247.com**

6 ACTIONS THAT MAKE A REAL DIFFERENCE

01 TURN ON AUTO-UPDATES

Phone / computer settings > Software Update. Enable automatic updates for the device, browser and apps.

02 USE STRONG, UNIQUE PASSWORDS

Use a password manager for unique 16+ character passwords. Turn on trusted dark-web or exploit monitoring for alerts if passwords or personal information leak.

03 ENABLE TWO-STEP SIGN-IN

Turn on multifactor authentication (MFA) for email, banking and important accounts. Prefer an authenticator app or passkey.

04 LOCK YOUR DEVICES

Use a strong PIN or passcode, fingerprint or face unlock. Set the screen to lock automatically.

05 STOP. CHECK. THEN CLICK.

Unexpected link, attachment or urgent message? Do not click. Verify using a phone number or website you already trust.

06 BACK UP & FIND YOUR DEVICE

Turn on automatic backups and Find My (Apple) or Find Hub (Android). Learn your device's remote lock and wipe functions in case it is lost or stolen.

START TODAY: **Update your devices + Turn on MFA + Check your backups**

These protections take minutes to set up and help every day.

PERSONAL DEVICE. REAL-WORLD RISK.

Keep personal and work accounts separate. Follow employer device policies.
If you suspect a work-related compromise, report it using your company procedure.
